

Drawing and Rendering

Rendered Props

Work Day:

Work in Class drawing and rendering of the four props provided for the assignment.

You will be creating developed renderings of each prop on a separate sheet of white sketchbook paper or black paper. At least two renderings **MUST** be on white paper.

Please draw a quick warm up sketch of each object in your sketchbook, then do a clean final drawing on a clean sheet of paper. Please focus on the accuracy of your drawing as well as color and saturation matching.

1.5 hours total per rendering.
