Morgue Research 3: Character Old Age

If you find additional interesting/useful information in your search, please include it!

Choose five actors, or other famous people (politicians, writers, musicians), that are the same sex as yourself that are at least 65 years old and create a decade by decade retrospective of their life going back to at least their 20's, teens if possible. The people you choose must be famous enough to have a good photographic record of their life. The people you choose may have passed away. Think carefully about how your search will populate into pinterest (most recent pins are the first ones on your board) and please search out each actor in a batch, please do not have actors mixed in with each other, and please try to do it in age/years order 20s to 70s or vice versa.

One of your five people may be a family member.

Avoid people who have obviously had plastic surgery to "correct" their age.
