

Costume Design Creative Collage

Expand the possibility of rendering options for a design presented through collage.

Description: Practice collage rendering techniques and explore options of fabric, paper, and mixed media (anything goes...). You will create three different collages of one clothing design inspired by the images provided creating one out of fabric, one paper, and one mixed media, but you may not draw, color, or paint. (You may have an “under drawing” design on which you build your collage)

Procedure: Utilizing the images provided as inspiration, design one costume and then create three collages that you could present in a design meeting, one using fabric only, one paper only, and one mixed media. The collages must be between ten and twelve inches high. The proportions are a 7 ½ head figure. You can use photographs, copies from art books, and magazine adds to create heads, hands, and feet and they must be in proportion to your overall collage size. The collages must include the whole figure. Create the collage on three different 11”x14” pieces of white poster board. You may use glue, double stick tape, or any other invisible medium to create your collage. NEATNESS COUNTS, as does creativity. You determine the color scheme, but it must be the same in all three collages (This is ONE design). You may use fabrics from my fabric bin. Please DO NOT waste fabric, and clean up after yourself.
