

Drawing and Rendering

Interior Perspective

Choose an interior perspective, which includes a corner, and draw and shade it. Please do a brief (10 to 15 minute) sketch to work out the perspective and details and then draw and shade the room, on a clean sheet of paper, including as much detail as possible. This should be done "from life".

The final drawing should take at least 2 and no more than 3 hours to complete.

Please take a photo of the interior perspective and email it to me by the start of class.
