

## **Drawing and Rendering**

### **Final Project, Light Renderings**

Choose three production photos from live dance or theatre. You may choose all your photo sources from the images provided, or you may find your own, or a combination of both. The images you choose must be approved regardless of their source.

Do a value pencil sketch in your sketch book of each image, pushing the contrast. These should take at least 30 minutes and no more than 60 minutes each.

Then do a light pencil sketch on black paper and render.
